Основу региональной стратиграфической схемы девонских отложений западной части Алтай-Саянской складчатой области (АССО) составляют горизонты, установленные в разрезах северо-восточного Салаира (нижний–средний девон) и окраин Кузбасса (средний–верхний девон). Разрезы этих районов тектонически разобщены и лишены взаимо-переходов. Со времени утверждения региональной схемы 1979 г. (Решения.., 1982) в регионе накоплен большой фактический материал по всем группам ископаемых, особенно по конодонтам, прошло несколько рабочих совещаний: Новосибирск, 2003, 2012, 2017; Новокузнецк, 2005. Усовершенствованный вариант схемы был составлен специалистами СиБРМС к 2012 г. Его принятие затормозилось из-за возникших в последние годы у разработчиков различных точек зрения.

Первая, которой придерживаются авторы настоящей статьи, сохраняет в новой схеме большую часть горизонтов, установленных предшественниками (Решения.., 1982; Ржонсицкая, 1968; Гагиев и др., 1987; Типовые..., 1992; и др.). В связи с появлением нового материала объем и положение в разрезе некоторых горизонтов изменено. Так, лохковскому ярусу соответствуют томьчумышский, петцевский и крековский горизонты, пражскому ярусу – малобачатский горизонт. Для части эмского интервала, занимаемой ранее беловским горизонтом, предлагается новое подразделение – раздольный горизонт со стратотипом у пос. Раздольный Гурьевского района (рис.). Акарачкинский горизонт нижнего живета включен в состав керлегешского. На северо-западной окраине Кузбасса вместо алчедатского горизонта в верхнем живете выделен мазаловско-китатский горизонт. Франскому ярусу соответствуют вассинский и соломинский горизонты, фаменскому – косоутесовский, митихинский, подонинский и топкинский горизонты (см. рис.).

Альтернативная точка зрения предполагает кардинальное изменение объема, ранга, стратиграфического положения, последовательности и наименования горизонтов (Язиков и др., 2016; и др.). Авторы статьи считают, что столь радикальное изменение сложившейся схемы лишено достаточных оснований.

Гагиев М.Х., Ржонсицкая М.А., Родыгин С.А., Тимофеева О.Б. Конодонты и корреляция девонских отложений Салаира // Материалы по стратиграфии и палеонтологии Сибири. Томск: Изд-во ТГУ, 1987. С. 30–46.

Решения Всесоюзного совещания по разработке унифицированных стратиграфических схем до-кембрия, палеозоя и четвертичной системы средней Сибири, 1979. Новосибирск, 1982. 129с.

Ржонсицкая М.А. Биостратиграфия девона окраин Кузнецкого бассейна. Л.: Недра, 1968. Т. I. Стратиграфия. 287 с.

Типовые разрезы пограничных отложений среднего и верхнего девона, франского и фаменского ярусов окраин Кузнецкого бассейна (Матер. V выездной сессии комиссии МСК по девонской системе 1991 г.). Новосибирск, 1992. 136 с.

Язиков А.Ю., Изох Н.Г., Соболев Е.С. Эволюционные преобразования биот (брахиоподы, кононты, аммоноиды) в эмс-эйфельских отложениях Салаирского палеобассейна // Материалы LXII сессии Палеонтологического об-ва. СПб.: ВСЕГЕИ, 2016. С. 202–203.
